## Software Engineer

| | |
|---|---|
| **Stakeholder Collaboration** | **Determining Requirements** |
| **Design Documents** | **Identifying Dependencies** |
| **Product Features** | **Design & Architecture Discussions** |
| **Data Analysis / Analytics** | **Following A Playbook** |

**Studies:**   **General Studies for Bachelor,** Computer Science, DUCA
**AS, Computer Networking Information Technology**, CCSF

**Technologies:**   Python, JavaScript, Node, React, GraphQL, MongoDB, SQL

---

## WORK HISTORY

---

**Full Stack Software Engineer,** Stealth Startup, Hybrid                    **2024- present**

- Leveraging 20+ open-source projects, refactored over 1,000+ lines,  ~1-week sprints.
- Node.js, JavaScript, React.js, Python, React Native

**Web Applications Engineers 3,** Adobe, Remote                    **2022- 2023**

- 35% data expansion, among 5+ peers drove a 75% enhancement due to 50+ updates.
- CI/CD on Adobe(AA, CJA, AEP) led to 20% increase in data quality with JavaScript solutions, in-house TypeScript library, MySQL queries, & Unified Shell React.js app.
- Observed 45% rise in actionable insights with CJA & Web SDK schema design in AEP.
- JavaScript, Node, TypeScript, React, MySQL, Adobe(Experience platform, Adobe Analytics, Customer Journey Analytics, Data Collection, Admin), Jira, Artifactory

**Interim Software Engineer L5,** Prose, Remote                    **2023- 2023**

- 20% lead, 60% software, 20% data; with a specific emphasis on React.js & GraphQL.
- Observed new component launch increasing visibility by 55%.
- JavaScript, TypeScript, Node.js, React.js, GraphQL, Jira

**Support Engineer,** Verizon**,** Remote                    **2022- 2022**

- Achieved 85% faster resolution, 95% quicker responses.
- Worked with 5+ peers often independently having resolved 2,000+ tickets.
- JSON, Data, Windows, APIs, Elastic

**App-cloud Services-Developer**, Wipro, Remote                    **2021- 2022**

- 95% mastery in Dev, 75% time cut, 30% increase in overall project success rates.
- Completed 100% of assigned coding projects ahead of deadlines.
- JS, Node, AWS, JSON, APIs, HTML/CSS, Shell, Data/Databases, SQL

**Software Engineer Intern**, StageIV, SF, CA                     **2020- 2020**

- Undertook the configuration of Google Analytics / data.
- Proactively identified & resolved 100% of the bugs inside a JS & HTML codebase.
- JavaScript, HTML, Google Analytics, Data

**Full Stack Software Engineer Intern,** Dance4Healing, SF, CA          **2020- 2020**

- 20% Node, MongoDB improvement amidst 5+ peers with CI/CD deployment to Heroku.
- Created 2+ tutorials utilizing Git / GitHub, & added 10+ crucial lines to the Markdown file.
- JS, Node, Express, Heroku, Jade, MongoDB, Google Analytics, Trello, Shell

**Full Stack Software Engineer,** Freelancer, SF, CA              **2019- 2020**

- Freelanced for Code the Dream instructor, handling 10+ edits, updates, & bug fixes.
- Freelance for a Noisebridge peer, addressing 25+ bugs on site with 10K+ lines of code.
- JavaScript, CSS / HTML, Data, JSON

---

## EDUCATION

---

**General Studies for Bachelor,** Computer Science, Dominican University of California (2021)
**Associate,** Computer Networking Information Technology, City College of SF (2023)

---

## ADDITIONAL EXPERIENCE

---

➢ **Certifications**

| | |
|---|---|
| **Fundamentals of Networking,** City College of SF | **2022** |
| **Software Development,** Code The Dream | **2020** |
| **Full Stack Development,** Meda Mission Techies | **2020** |
| **Front End Web Development,** Code Tenderloin | **2019** |

➢ **Work Examples**

| | |
|---|---|
| **Portfolio:** EngineerLWR.com | **2019- present** |
| **GitHub:** GitHub.com/LWRGitHub | **2019- present** |

➢ **Projects**

| | |
|---|---|
| **Tech Career Time,** TechCareerTime.com | **2023- present** |
| **Auto Job Search,** GitHub.com/LWRGitHub/job-search-scraping-linkedin | **2023** |
| **Vegan Query,** GitHub.com/VeganQuery/VeganQuery.GitHub.io | **2021- 2022** |
| **CS Scraper,** GitHub.com/LWRGitHub/CS_Scraper | **2020** |
