👤 Profile

Highly skilled full stack software engineer adept at utilizing creativity and problem-solving abilities to meticulously craft user-friendly applications with a strong emphasis on testing and benchmarking. Proficient in developing innovative design approaches across diverse environments.

🎓 Education

Computer Science | General Studies for Bachelor
Dominican University of California

CS & CNIT | Undergrad
City College of San Francisco

Fundamentals of Networking | Certificate

Front End Web Development | Certificate

JavaScript | Certificate

Software Development | Certificate

Full Stack Development | Certificate

💼 Work Experience

09/2023 – PRESENT   UNITED STATES
Interim Fractional CTO
Prose
- Actively participating in software engineering processes with an objective of assuming responsibilities for a team of engineers.
- JS, Node.js, React.js, GraphQL, Git/GitHub, Jira, Terminal/Shell/UNIX CLI, npm/yarn, JSON, DOM, HTML/CSS, Chrome Dev. Tools, API

10/2022 – PRESENT   UNITED STATES
Web Applications Engineer 3
Adobe
- (CI/CD) for Adobe Analytics/CJA, maintained FEW & BEW in-house software on Adobe Marketing cloud.
- JS, Node.js, Adobe Experience Cloud products such as AA (e.g. Workspace, Admin Report suites, Processing Rules, eVars, Traffic Variables, etc.), CJA, Web SDK, Data Collection, Admin console), React, SQL, npm/yarn, Git/GitHub, Shell/Terminal, Jira, HTML/CSS, DOM, APIs, Chrome Dev Tools ,Resource Override, Charles Proxy, Postman, Data/Databases, Mac, Markdown, Cloud Development

07/2022 – 10/2022   UNITED STATES
Support Engineer
Verizon
- Comprehensive engineering, resolving issues with minimal supervision, showcasing problem-solving skills & a proactive approach.
- JSON, Data, Windows, APIs

12/2021 – 10/2022   UNITED STATES
App-cloud Services-Developer
Wipro
- Rigorous application development training, with extensive knowledge & skills to develop & maintain code base utilizing diverse technologies.
- JS, Node.js, SQL, JSON, APIs, HTML/CSS, Windows, Shell, Data/Databases, app-cloud services development

💼 Work Experience

06/2020 – 08/2020   UNITED STATES
Software Engineer Intern
StageIV.org
- Configured Google Analytics. Detected & resolved bugs within a JS/HTML codebase, ensuring smooth (UI/UX).
- JS, HTML, Google Analytics, Terminal

04/2020 – 08/2020   UNITED STATES
Full Stack Software Engineer Intern
**Dance4Healing.com**
- (CI/CD) practices for a Node.js application stored in GitHub, effectively testing & deploying on Heroku.
- Express.js, Heroku, Node.js, Jade, MongoDB, JS, HTML, CSS, Bit Bucket, Git, GitHub, Google Analytics, CI/CD, npm, yarn, Trello, Terminal

⭐ Strengths

Production grade systems resiliency/reliability	
Limiting complexity	Deterministic automation
Continually improving experience	Optimizing sustainability
Complex migrations	Performance optimization
Cloud architecture	User accessibility

🌐 Projects

Scraping Craigslist/Trash Nothing | github.com/LWRGitHub/cs_scraper
- Web scraping app extracting data via Craigslist & Trash Nothing.
- PY, Beautiful Soup 4, Selenium, Request, Dotenv, Git/GitHub, Unix CLI

Vegan Query | github.com/VeganQuery/VeganQuery.github.io
- Vegan recipe search engine scraping to extract & integrated data.
- Selenium, BeautifulSoup 4, JS, HTML/CSS, React.js, Bootstrap, Git/GiHub, Terminal
